

Tigera Deployment Solutions

Software installation and deployment services

Tigera Consulting is your trusted partner in the deployment of your Tigera solution

Tigera's consultants bring a wealth of experience and expertise in extending the capability of your firewalls to Kubernetes environments. Our consultants will design a custom roadmap to your success and assist you in each and every step of your deployment. Accelerate the adoption of microservices by implementing fine-grained access controls in your applications.

Tigera Deployment Service is built around a proven seven-step methodology that is designed to deliver results within the shortest time possible.

1. Installation or Upgrade

We help you install or upgrade Tigera Secure within your environment and configure it to meet production security and scale requirements.

2. Cluster Hardening

We work with you to understand your security and hardening guidelines and implement policies that secure your cluster.

3. Multi-Tenancy & RBAC

We identify the different user personas and map them to specific rights and permissions within Tigera Secure.

4. Labels & Policies

Together we define a label nomenclature, taxonomy and network policies that meet your security and access control requirements.

5. Visibility & Flow Logs

We configure the logging and visualization tools that provide the visibility that you need into your flow logs.

Tigera Deployment Solutions

Software installation and deployment services

6. Threat Defense

We enable anomaly detection powered by machine learning for your flow and audit logs. We integrate threat intel feeds to block known malicious connections, and configure alerts for policy violations.

7. Logging, Alerting & Ticketing

We integrate Tigera Secure with your existing Logging, Alerting, and Ticketing infrastructure so your teams can continue to use the same workflow they use today.

Key Capabilities

Tigera Deployment and Enablement Services are designed to accelerate your success.

Deployment packages have been designed based on key learnings and best practices from deployments at several fortune 100 customers.

All packages include the following:

- Network & Security Design Review
- Validation of pre-requisites
- Solution Design & Architecture
- Defining Success Criteria and developing test plans
- Installation and configuration consulting & support
- Implementation of policy best practices and security workflow
- Implementation of visibility and monitoring
- Project Management

Different deployment packages are available that are aligned with the size and complexity of your installation.

Your Tigera account team will work with you to identify the package that is right for you.
